MEDICAL CONSUMABLES

<p><u>AGFA DT2B</u> Sizes available: 20×25 cm 25×30 cm 28×35 cm 35×43 cm</p>	<p><u>FUJI MEDICAL DRY IMAGING FILM</u> Blue base that produces clear stable images. Sizes available: 20×25 cm 25×30 cm 26×36 cm 35×43 cm</p>
<p><u>CARESTREAM DRYVIEW DVE LASER IMAGING FILM (100)</u> Sheets DVE 100 Sheets Imagers DV 5800, 5850 Sizes available: 20×25 cm 25×30 cm 28×35 cm 35×43 cm</p>	<p><u>FSURGICAL LEAD GLOVES - "LEAD FREE" GLOVES</u> Natural compounded latex Powder – free Lead- free High tensile strength Textured finger/palm Maximum attenuation Maximum tactile sensitivity</p>
<p><u>Carestream Dryview DVE Laser Imaging Film DVE 125 Sheets</u> Imagers DV 5700, 5950, 6950 There is even more reason to switch to Carestream Dryview DVE Laser Imaging Film. Our diagnostic-quality, blue-tone films last longer, improve image visibility, handle more efficiently and maximize your film supply inventory. Extended Shelf life Dryview Film is supported by proven</p>	<p><u>SYRINGES & LINES</u> We offer a variety of high-pressure sprayers and pressure connection hoses with excellent performance and reliability. In addition, we have a full line of connecting tubing including long, spiral, straight, tee, one-way valves, double-check valves, and non-return valves to meet doctors' different needs. Furthermore, we have a wide range of consumables including transducers, inflatable devices, manifolds, paint syringes, control syringes, introducer sets, hemostasis valves, positive needle-free connectors, and vaccine syringes.</p>
<p><u>FUJI SUPER RX</u> High resolution Fine grain High processing capacity High quality diagnostic images Consistent image quality Easy film handling</p>	<p><u>ULTRASOUND GEL</u> High Viscosity Water Soluble High Conductive Non Staining – Clear in colour Non Sticky Slow drying Long shelf life</p>
<p><u>FUJI SUPER HR-U</u> High resolution Fine grain High processing capacity High quality diagnostic images Consistent image quality Easy film handling</p>	<p><u>LED VIEWING BOXES</u> - Light source LED, Totally flicker free Slim line only 4cm thick Lifespan of LED 80 000 hours Adjustable brightness 50% Brightness 5000 cn/m2 Film activation to switch on or manual</p>
<p><u>MOBILE APRON TROLLEY</u> Available in different models: Holds 5-10 aprons. Holds 10-20 aprons. Holds 5-10 aprons with a complete storage tray.</p>	<p><u>WALL MOUNTED APRONS HANGARS</u> Available in different sizes from 1 to 6 arms.</p>

MEDICAL CONSUMABLES

POSITIONING SPONGES PS

Available as singles or set of 10.

THYROID COLLARS T1 & T3

(T1)

Thyroid and sternum shield, Velcro at the back, 0.50 Pb Eq
Available in normal lead, light lead and "lead-free".

(T3) Velcro at the back, 0.50 Pb Eq

Available in normal lead, light lead and "lead-free".

VEST AND SKIRT V1

Velcro and QRB in front

Available in normal lead, light lead and "lead-free".

DOUBLE & SINGLE SIDED APRON

(DOUBLE)

Velcro and/or QRB ,0.25, 0.35, 050 Pb Eq

Available in normal lead, light lead and "lead-free".

(SINGLE)

Velcro and/or QRB

0.25, 0.35, 050 Pb Eq

Available in normal lead, light lead and "lead-free".

BRIGGATE PATSLIDE

Facilitates safe and easy patient transfers.
Reduces the risk of back injury for the carer.
Hand-holes provide maximum grip for carer. Slip resistant pads increase stability. Radiolucent material construction makes the Patslide lightweight, highly impact tolerant and static insulative. NOT to be used as a lifting device

PORTEGRA 2® SUSPENSION ARM

Radiation protective shields, lamps, monitors, injectors and other accessories can be attached and positioned as required. Shock-absorbing, plastic covers protect from collision damage. Internal steel cable provides safe support even after many years of service. Specially designed collar guarantees a firm connection with the equipment. Multiple load bearing categories allow weights up to 18.0 kg (39.7 lbs).

PROTECT-A-GRID

Handles on short or long axis

Durable

Smooth non-porous surface

Curved corners

Custom made for all brands

MAVIG X-RAY PROTECTIVE SHIELDS

High transmittance for best visibility. Rounded corners and edges, as well as shatter-proof material offering low risk of injury.

Safety lock, easy-to-guide handle and a specially designed MAVIG connection element provide. Great agility and additional safety. ©MAVIG GmbH, Munich

WEIGHT DISTRIBUTION CAP

Rated up to 760lbs of direct patient weight

Available in clear or opaque top

Available with or without handle

Slip resistant

Cutouts for tether

LEAD PROTECTIVE WEAR

All aprons and accessories are available in:

Traditional lead, light lead and "lead free"

Various sizes, colours, models

0.25, 0.35 and 0.50 Pb Eq OR combinations thereof

MOBILE APRON TROLLEY

Available in different models:

Holds 5-10 aprons. Holds 10-20 aprons.

Holds 5-10 aprons with a complete storage tray.

GENERAL EQUIPMENT

PORTABLE ULTRASOUND SYSTEM

ARIETTA PRECISION

A diagnostic ultrasound system with unprecedented style, is sure to fulfil your requirements. Designed to fit into a confined space, and with an image quality that will not disappoint Proven Ultrasound-Meeting your Ideal. Fit for the operating room.

Arietta Precision. A comprehensive range of compatible transducers grouped by application, scanning region and operative method, provide support for minimally invasive through to open abdominal surgery.

CART BASED SYSTEMS

ARIETTA 850

Premium Ultrasound scanner. Sense and visualize ultrasound.

Great examination precision, greater comfort, and a wide range of applications are now possible with ultrasound imaging. In response to the ever-increasing expectations of the medical profession, diagnostic equipment continuously evolves. “Image quality”, “workflow” and “applications” are three keys functional areas where we have made a determined effort to refine fundamental performance, with the goal of creating the ultimate ultrasound platform. Flexibly responding to users’ individual needs across the range of clinical disciplines, the Arietta 850 brings diagnostic imaging without compromise.

ARIETTA 50

The next stage in Usability.

This entry level model of the Arietta series invites easy operation from beginners through experts. Its outstanding easy to view 21.5-inch monitor and intuitive, user friendly operability will bring you to the next “stage”. High quality imaging across a broad clinical range that includes abdominal, Musculoskeletal, Obstetrics and gynaecology, Cardiac and Vascular.

Lifeline AUTO AED

The one-button defibrillator

The Lifeline AUTO is a fully automatic defibrillator designed to analyze heart rhythm and automatically deliver a shock – without intervention

CWM-201A Anesthesia workstation

Integrated breathing circuit with APL valve, excellent tightness.

Replacing drive bellow is not required when operating adult/paediatric anesthesia, applied with 1 high-precision vaporizer, 7 inch screen with no dead space, Real-time detection for loops, paw, BPM, VT, and compliance. Comprehensive monitoring capabilities include ventilation, parameters monitoring, preset parameters, alarm indication, and breathing waveform monitoring. ACGO available to connect with T/Bain circuit for open operation. Yoke system with back up cylinders (A type with 11L size)

Theatre Operating Table

Can be easily adjusted as per the requirement of the patient. Used for various purposes such as treatment, recovering, rehabilitation and operation.

Premium quality

Excellent finish

Smooth operation
